Item #: 235871 - CASTLECREEK® Cedar Log Side Table

sportsmansguide.com

## Parts List

### Bag Contents

- 8 nails
- 1 bottle of glue
- assembly guide

### Required Tools

- Hammer or rubber mallet

CASTLECREEK® furniture is quality-crafted in Canada, from Northern White Cedar (*Thuja occidentalis*), a wood famous for its beauty, practicality, durability and other important advantages:

- creamy white color blends with any decor
- smooth surface ensures comfort and good looks
- naturally resistant to rot and insect damage
- weathers gracefully to a silvery gray when left untreated
- may be stained with quality exterior wood sealants
- will not shrink or warp

### A note about log furniture

All log furniture is subject to a natural process called "checking." As wood releases moisture, checking can occur across or through its annual growth rings. This normal result of wood seasoning occurs only on the surface of the wood, and does not affect the wood's structural performance or integrity.

## Important

Read, understand and follow all warnings, cautions and assembly instructions before assembling or using this product. Failure to do so may result in serious injury, death or damage to property.

Confirm all parts are present and undamaged before assembly. Please contact Sportsman's Guide customer service for any needed part before assembly.

**⚠ WARNING:** This package contains small parts and is a choking hazard, keep away from children and pets during assembly.

When you need to use glue for assembly, quickly complete all steps without interruption.

Once assembled, make sure the product is placed on a firm, level surface.

Solid wood such as this has knots and cracking which are normal and should be considered an enhancement to the natural beauty of this product.

Do not exceed the weight limit of 25 pounds (11 kg).

1

Join one leg with the shelf, as shown. Repeat to join the three other legs. Apply glue inside this holes before each insertion.

2

Lay the top flat on the ground and insert the legs, as shown. Apply glue inside the holes before each insertion.

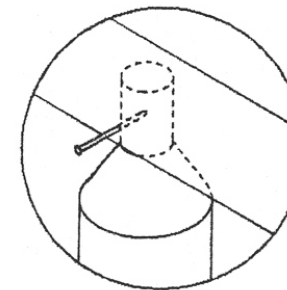

Make sure that the wood grain is the same for the shelf and the top of the side table.

3

Set the table on its legs to stabilize it. Make sure the top is level. If not, make adjustments at the joints by varying the depth of insertion on the parts. Finally nail the joints to strengthen them as illustrated.

Nail joints at a perpendicular angle only.
