

MODEL 10 GRS

Whether you're looking to beat top long-range shooters or just your personal best, you'll push precision to the limit with the new Savage™ Model 10 GRS. The rifle houses the full suite of accuracy-enhancing Savage features firmly within a GRS stock made of 15 percent fiberglass-reinforced Durethan®, with 65 percent glass bedding material. The rock-stable stock's slimmed-down dimensions and textured surfaces provide a better grip in wet conditions, while its length-of-pull can be adjusted to fit any shooter. Its Savage action, precise button rifling, fluted heavy barrel and user-adjustable AccuTrigger™ deliver the accuracy of customrifles at a fraction of the price.

- GRS adjustable stock made of 15 percent fiberglass-reinforced Durethan
- User-adjustable Savage AccuTrigger
- Slim grip and fore-end with textured rubber grip surfaces
- Adjustable length-of-pull from 33.5 to 36.5 cm
- 5/8-24 threaded muzzle
- Fluted heavy barrel
- 10-round AICS-compatible magazine
- Flush cup sling loops included and sling mount for bipod use installed
- Available February 2017
