**USER GUIDE**

**SR4-MOA RETICLE**

## SR4-MOA RETICLE

The SR4-MOA is a hybrid BDC reticle with holdovers for various 5.56mm/.223 Rem. and 7.62mm/.308 Win cartridges. Always be sure to verify your specific ballistic performance prior to utilizing this guide.

The SR4-MOA Reticle is placed on the Riflescope's first focal plane (FFP). When locating the reticle on the first focal plane, its scale is always accurate regardless of magnification setting.

## USING THE SR4-MOA RETICLE

The SR4-MOA reticle contains ten holdover points placed below the center circle. Depending on the zero distance chosen, your rifle/ammunition combination, and use; each point will represent a specific distance.

The example below is based on a 55gr 5.56mm projectile traveling at approximately 3100 feet per second. For this example, a 100 yard zero was utilized.

Target distance is 225 yards,  
come up is 1.75 MOA

Target distance is 435 yards,  
come up is 7.25 MOA with  
a 1.0 MOA wind hold

Target distance is 650 yards,  
come up is 15.4 MOA with  
a 2.0 MOA wind hold
