12	Rear Axle	1	25	Hex Head Bolt 6*40mm	1
13	Big Locking Nut	1			

Tools Needed for Assembly - Not Included

- wrenches 10mm, 17mm and 22mm
- pliers (optional)
- phillips screwdriver

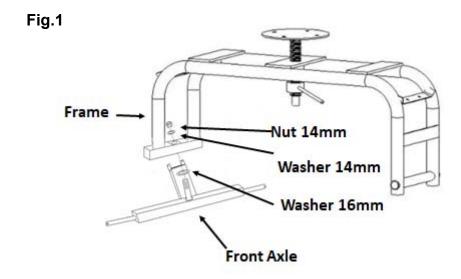

USE AND CARE

WARNING: This package contains small parts and is a choking hazard, keep away from children and pets.

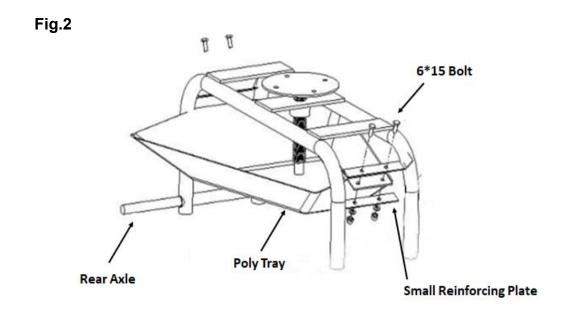

- **Not intended** for use by children. Do not leave children unattended around this product. Store in a secure place out of the reach of children.
- **NEVER** attempt to modify this product or subject it to an installation or use for which it was not designed. Doing so may result in damage and/or serious injury.
- **NEVER** exceed the weight limit total of 400 lbs for the cart
- NEVER load the basket with more than 30 lbs.
- ALWAYS thoroughly inspect your cart for loose parts and/or signs of damage prior to each
 use.
- **NEVER** use your cart until any loose parts have been properly secured or damaged parts have been properly replaced.
- Store idle Deluxe Garden Cart. Inspect it for good working condition prior to storage and before re-use.

ASSEMBLY

1. Place the 16mm washer (#16) and the front frame (#05) onto the front axle (#14). Secure with a 14mm washer (#17) and a 14mm nut (#18) as shown in Fig.1, tightening the nut with a wrench.

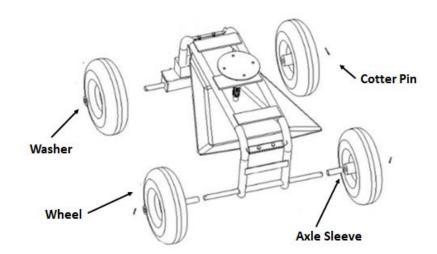

2. Insert the rear axle (#12) through the rear axle frame as shown in Fig.2. Using the small 6*15 mm bolts (#4), washers (#21) and nuts (#22) attach the poly tray (#7) front first to the frame, using the small reinforcing plate (#19). Place the plate under the front rim of the tray, lining up the holes with the pre-drilled holes in the pre-welded front tray bracket. Hold each nut with a wrench or pliers while tightening each bolt with a phillips screwdriver.

3. Slide one axle sleeve (#08) onto each end of the rear axle (#12) as shown in Fig.3. Using the washers (#10) packaged with the cotter pins (#11), followed by a wheel (#9) with valve stem facing towards you, secure one onto each end of the rear axle. Slide a cotter pin through the pre-drilled hole at the end of the axle. Open the cotter pin and wrap the ends of the pin back around the axle to secure each wheel. (Note: Axle sleeves are not used on the front axle.)

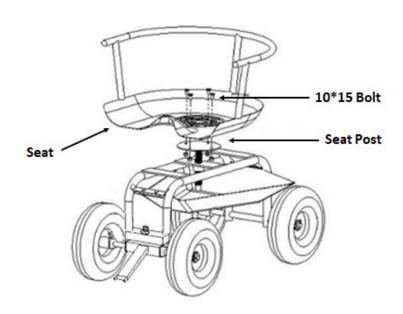

Fig.3

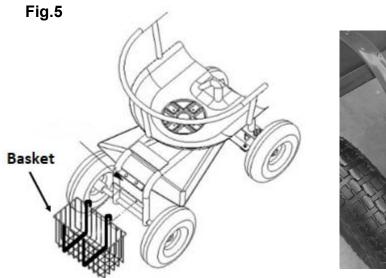

4. Attach the seat (#2) to the seat post with 4 - 10*15 mm bolts (#3), washers (#23) and nuts (#24). Use a pliers and a phillips screwdriver to fully tighten the bolts in place as shown in Fig.4. Note that the threaded stem of the seat post has a washer and cotter pin pre-installed. Check by looking under the seat to make sure the cotter pin is wrapped around the shaft and secure.

The seat may be raised or lowered to a desired height simply by turning it clockwise or counterclockwise. We recommend adjusting the seat to a height where your feet rest level on the ground.

Fig.4

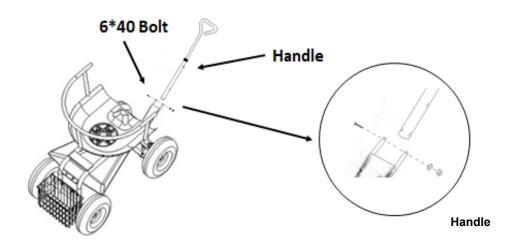

5. Hang the basket (#6) onto the rear frame (#5) as shown in Fig.5.

6. Attach the handle (#15) to the front axle with one 6*40mm bolt (#25), washer (#21), nut (#22) as shown in Fig.6.

Fig.6

7. Place the seat cushion pad (#20) and tool bag (#1) on metal seat (#2) as shown in Fig.7.
