LINE EXTENSION 2020

BONDSTRIKE™

Extreme Long Range

BONDSTRIKE now in 6.5 Creedmoor

Designed from the ground up for extreme long-range accuracy and terminal performance on game at all distances and velocities. BONDSTRIKE is bonded for weight retention and penetration, with a ballistic coefficient that stands out from the crowd. In magnum calibers BONDSTRIKE achieves the same weight retention at close range, and much better weight retention at long range, than the most notable bonded bullets on the market today. BONDSTRIKE delivers exceptional accuracy with its aerodynamic design. For 2020, the BONDSTRIKE line adds the popular 6.5 Creedmoor.

KEY FEATURES:

- Aerodynamic polymer tip for high BC and quick expansion
- Thinner front-jacket for expansion at all ranges
- Power bonding technology for high residual weight and penetration
- Match boat tail for high BC giving speed and extreme precision at long range

BONDSTRIKE™ AT 330 YARDS
