LINE EXTENSION 2020

TIPSTRIKE™

Instant Stop

Extreme knock-down power

Developed for maximum stopping power, excellent energy transfer and penetration deep enough to reach the vital organs of game animals, the TIPSTRIKE polymer tip ensures rapid, predictable expansion and gives a devastating shock effect due to the tapered construction of the bullet jacket. To prevent bullet core separation, the jacket is reinforced with a mechanical lead-lock, thus making TIPSTRIKE™ an outstanding bullet for shots where an immediate stop on game animals is the desired result. For 2020 we are expanding the TIPSTRIKE line to include three popular small game hunting calibers: 222 Remington, 223 Remington and 22-250 Remington in the TIPSTRIKE varmint line.

KEY FEATURES:

- Aerodynamic polymer tip for high BC and rapid expansion
- Thin jacket for massive stopping power
- Lead-lock guaranteeing deep penetration

TIPSTRIKE™ AT 110 YARDS
