## FOOD PLOT MIX

APPROVED BY LEE & TIFFANY LAKOSKY

### SOMETIMES CHANGE IS A GOOD THING!

**Why team with Ani-Logics?  
The answer is simple.**

We care immensely about the health of our deer herd. Working with Ani-Logics gave us the opportunity to combine proven science with extensive research and field-testing to create seed plot mixes with superior nutrition and amazing attraction.

Most importantly, we chose Ani-Logics for you; our trusted vendors, devoted fans, and loyal customers. Crush® seeds have been upgraded, reformulated, and redesigned; giving you a higher end-product for the same low price. Bottom line, we want to give you the best products on the market to successfully hunt and harvest your personal best!

We are grateful for your following and support over the years, and humbly ask you make the switch to the Ani-Logics® Crush® line of products. ~ Lee & Tiffany Lakosky

**Question:**

What do you get when you combine the scientific knowledge of Ani-Logics Outdoors® and the real world, in-the-field expertise of The Crush® with Lee and Tiffany Lakosky?

**Answer:**

A technologically-advanced seed line called **Seeds of Science™**, featuring new and improved seed blends with unrivaled whitetail nutrition and attraction!

THE PERFECT 10™

PRO CLOVER

PRO SUGAR BEETS

# BEAN BLEND

COMING SOON!

10LBS

### COVERAGE

10lbs • 1/4 Acre • Plants 11,000 square feet

ANNUAL

SPRING

Give deer the beans they crave! Plant CRUSH® SEEDS OF SCIENCE™ Bean Blend in the spring for your next killer food plot. Beans are high in protein and offer crucial health and antler boosting nutrients. Lee and Tiffany know just how much deer love soybeans, but they also know that deer can devour a bean plot in a very short time. We developed a drought resistant soybean/legume mix that withstands heavy grazing pressure, saving your kill plot for hunting season!

# CAVEMAN BLEND™

Blend Contents: Crimson Clover, Forage Turnips, Rape, and Ryegrass

#24004 • 3.5LBS • \$14.99

### COVERAGE

3.5lbs • 1/4 Acre • Plants 11,000 square feet

ANNUAL

FALL

CRUSH® SEEDS OF SCIENCE™ Caveman Blend™ is a killer food plot mix, so easy to grow, even a caveman can do it! Nothing is more frustrating than planting a food plot that never grows. This easy-start, quick-growing blend helps those of us, who despite our good efforts, struggle to establish a usable food plot. The easy, no-till formula, gives you a ready-to-hunt green food source in as little as 2-3 weeks, making it a great late summer/early fall plant.

# THE PERFECT 10™

Blend Contents: Forage Winter Wheat, Rye Grain, Forage Oats, Winter Peas, Crimson Clover, Ani-Crush™ Radish, Forage Collards, Ani-Crush™ Turnip, Ani-Crush™ Sugar Beets, and Rape

#24001 • 10LBS • \$26.99

#24014 • 20LBS • \$53.99

### COVERAGE

10lbs • 1/4 Acre • Plants 11,000 square feet  
20lbs • 1/2 Acre • Plants 22,000 square feet

ANNUAL

FALL

The Perfect 10™ is your ultimate food plot solution, combining 10 of the most preferred forages for white-tailed deer. This all-in-one blend was formulated specifically for use on Lee and Tiffany's personal hunting grounds, using 10 of their favorite seed varieties. Diversity and longevity are what makes this mix attractive to deer from the first day of the season to the last!

# HOLY CLOVER

Blend Contents: Sainfoin, Yellow-Blossom Alfalfa, Ani-Crush™ White and Red Clovers, and Creeping Alfalfa

#24015 • 20LBS • \$139.99

### COVERAGE

20lbs • 1 Acre • Plants 44,000 square feet

PERENNIAL

SPRING/FALL

Searching for an alternative to regular clover plots? Up your hunting game and spice up your food plots with this unique blend of Holy Clover, special alfalfas and premium clover varieties. Diversity and alternating maturity levels give deer available, preferred food options throughout the season. This food plot mix offers extreme drought tolerance, grazing resilience, and high protein content; giving you a food plot that is nutritious, delicious, and has incredible attraction!

# CLOVER PLUS ALFALFA

**Blend Contents: Creeping Alfalfa, Yellow-Blossom Alfalfa, Ani-Crush™ White and Red Clovers, Select White Clovers, and Crimson Clover**

**#24012 • 10LBS • \$89.99**

### COVERAGE

10lbs • 1 Acre • Plants 44,000 square feet

PERENNIAL

SPRING/FALL

Grow incredible, lush recruitment plots that withstand heavy grazing pressure with Crush® Seeds of Science™ Clover Plus Alfalfa. This high protein, high forage mix contains the best perennial varieties preferred by white-tailed deer! After years of extensive testing and research, the Ani-Crush™ team developed what we call the perfect blend of premium clover and alfalfa. Different maturity times, means there will always be a preferred, ready-to-eat option for your deer herd.

# PRO BRASSICA BLEND

**Blend Contents: New Zealand Brassicas, Forage Collards, Ani-Crush™ Turnip, Ani-Crush™ Radish, and Forage Rape**

**#24003 • 2LBS • \$17.99**

**#24013 • 8LBS • \$59.99**

### COVERAGE

2lbs • 1/4 Acre • Plants 11,000 square feet  
8lbs • 1 Acre • Plants 44,000 square feet

ANNUAL

FALL

Brassicas make the best fall kill plots! So, planting Crush® Seeds of Science™ Pro Brassica Blend for late season whitetail attraction is a no-brainer. We combined Lee and Tiffany's most trusted and preferred brassica varieties to create food plots that maximize tonnage and protein levels, while enduring extreme temperatures and drought tolerance. It's a real showstopper!

# PRO CLOVER

**Blend Contents: Ani-Crush™ White and Red Clovers, Select White Clovers, Balansa Clover, and Crimson Clover**

**#24002 • 2LBS • \$19.99**

**#24011 • 8LBS • \$69.99**

### COVERAGE

2lbs • 1/4 Acre • Plants 11,000 square feet  
8lbs • 1 Acre • Plants 44,000 square feet

PERENNIAL

SPRING/FALL

Put the knowledge and expertise of the pros to work in your food plot with Crush® Seeds of Science™ Pro Clover. After years of testing and research, the Ani-Crush™ team was able to develop what we call the perfect blend of clover varieties. Diversity of this blend maximizes forage biomass and protein content, supporting herd health and antler growth; making it the perfect choice for kill plots. These long-lasting perennials survive up to 5 seasons; going the extra mile for all season attraction!

# PRO SUGAR BEETS

**Blend Contents: Ani-Crush™ Sugar Beets, Select Clovers, and New Zealand Brassicas**

**#24010 • 4LBS • \$44.99**

### COVERAGE

4lbs • 1/2 Acre • Plants 22,000 square feet

ANNUAL

SPRING

Create a field of nature's candy and offer your deer amazing late season attraction with Crush® Seeds of Science™ Pro Sugar Beets. This killer blend is a result of years of research and extensive testing, resulting in a tempting mix that deer can't resist. Sugar beets, premium brassicas, and superior clover varieties make this easily established food plot a Lakosky favorite. The exceptionally high sugar content of these premium sugar beets maximizes attraction and palatability; making this an irresistible sweet treat for whitetails!
