Over 50 years ago, a boot arrived in Alaska, as rugged and real as the people who live and work there. Like Alaska's people, those boots did their job no matter what the conditions. Now an Alaskan icon, the Legacy Boot is 100% waterproof, flexible, and durable—made to keep you dry, stable, and always working comfortably. Featuring a non-marking, slip-resistant Chevron outsole, they're as reliable and tough as it gets. In fact, they're part of what it means to be an Alaskan.

The Legacy Boot works, and in the eyes of Alaskans, that's a beautiful thing. Dubbed the "Alaskan sneaker"—it has been performance tested and proven across the toughest stretches of water, from Misty Fjords to Kodiak, from the Bering Sea to Harrison Bay. XTRATUF boots and footwear have become the badge of ultimate preparedness for the individuals of Alaska – the people who arrive as lone wolves and become part of a pack. The XTRATUF boots they wear prove a reliable partner through thick and thin, keeping multiple generations safe, dry and moving forward one sure step at a time.

	100% WATERPROOF	Boots and footwear that are built to be 100% waterproof
	WATER RESISTANT	State of the art durable water resistant (DWR) treatment
	XPRESSCOOL™	Anti-microbial evaporative cooling liner that helps regulate foot temperature to keep you comfortable in both cool and warm environments
	BREATHABLE MESH	A highly durable sandwich fabric which allows the foot to breathe
	OIL RESISTANT	RDR® rubber will outwear standard rubber boots in solvents, caustics, hydrocarbons, oils, fats & acids
	ACID CHEMICAL RESISTANT	Triple dipped, latex Neoprene creates a seamless exterior / tested against organic and inorganic acids and chemicals
	SLIP-RESISTANT	Our SRA rated slip-resistant outsoles are made from an exclusive rubber compound that grips the floor surface creating sure footing
	TUFGRP	Next level traction on flat surfaces and uneven terrain / SRC rated to deliver next-level non-marking grip
	SRC	SRC is the highest rating for slip resistance under the EN ISO 20345-2011 standard and requires passing both the SRA and SRB tests
	GLACIER TREK™ PRO	Proprietary outsole compound providing secure footing on wet, icy surfaces while also being SRC rated
	COMPOSITE TOE	Boots are tested to meet ASTM F2413-18 M/I/C
	STEEL TOE	Boots are tested to meet ASTM F2413-18 M/I/C
	CANADIAN STANDARDS ASSOCIATION	Boots are tested to meet CSA Z195-14
	TEMPERATURE RATINGS	Suggested ratings to determine the right boots for any weather situation

PRODUCT TENETS

**100% DRY
100% READY
TO KEEP GOING**

100% WATERPROOF

Thanks to Neoprene latex rubber - vulcanized to further seal and strengthen.

**THE GRIP YOU
NEED, AND
THEN SOME**

**RATED
SLIP-RESISTANCE**

Our outsoles pass the highest lab tested rating, from soapy ceramic floors to glycerol-coated steel.

**DECKS
NEED ENOUGH
CLEANING**

NON-MARKING

Our Chevron outsole leaves no mark on any surface.

**PROTECTS FROM
ENGINE OIL TO
FISH GUTS**

**OIL & CHEMICAL
RESISTANT**

Our patented RDR® technology resists many organic and inorganic oils, solvents, acids and chemicals.

**PLIABLE
COMFORT THAT
LETS YOU MOVE**

**TIPPLE-DIPPED
RUBBER**

Our unique process provides flexible, seamless, durable, all-day comfort.

EXPLORER GRADE

Built for performance and versatility, XTRATUF Explorer Grade products enable watermen everywhere to go farther and do more with professional-grade slip resistant boots and footwear. Designed with the product tenets of traction, agility, all-day comfort and protection coupled with Alaskan inspired lifestyle aesthetics.

ADB SPORT

XTRATUF® has been making commercial fishing boots for over 60 years. As fishing has evolved so has fishermen's needs, so we continue to innovate and solve for how our boots and footwear can help them feel safe, confident, and comfortable. This season the all new Ankle Deck Boot Sport brings you everything you would expect from your XTRATUF® boots but in a sportfishing specific silhouette that is up to 30% lighter than other 6" boots in this category. This ADB Sport is built from a new high-performance foam PRO LITE which is ultra-durable and slip resistant, all while being a one-piece outsole. This boot delivers the comfort and agility of a sneaker with long cushion life and high energy return, all while offering the same traction benefits of a full rubber boot.

CHEVRON OUTSOLE

PULL-ON TABS

A person is shown from the waist down, standing on the deck of a boat. They are wearing a dark green long-sleeved shirt with "XTRATUF" and "PR EN - OF" visible on the back, light-colored cargo shorts, and white XTRATUF ADB ECO ankle deck boots with green and blue accents. They are holding a fishing rod with a blue reel. The background shows a cloudy sky and the ocean. The text "ADB ECO" is overlaid in large white letters.

ADB ECO

Introducing our first Eco-friendly Ankle Deck Boot. The ADB ECO builds on our heritage and what we do best with the addition of Yulex, the World's first plant-based replacement for our standard neoprene. XTRATUF Deck Boots have been crafted specifically for sport and recreational fisherman. Anglers are athletes and they need proper footwear to help them perform at their best. We used our lightweight silhouettes, with the same XTRATUF non-marketing, slip resistant Chevron outsole. The ECO is 100% waterproof built with Yulex, a natural rubber derived from the sap of the Hevea Tree. This boot is equally as durable, flexible, and comfortable as the original ADB.

XPRESSCOOL™ LINING

A man with a beard, wearing a brown baseball cap, sunglasses, a green hoodie, and tan cargo pants, is standing on the deck of a white boat. He is holding a fishing rod and reel, looking down at the water. A brown dog is sitting on the deck to his left. The background shows a cloudy sky and the ocean. The text "ANKLE DECK BOOT" is overlaid in large white letters.

ANKLE DECK BOOT

XTRATUF® Deck Boots have been crafted specifically for sport and recreational fishermen. Anglers are athletes and they need proper footwear to help them perform at their best. We've created lightweight silhouettes with the same XTRATUF® non-marking, slip-resistant Chevron outsole as our iconic Legacy boot.

LEATHER ANKLE DECK BOOT

No matter what the season or occasion fishermen require XTRATUF performance while mending nets, maintaining engines or just enjoying life off-the-water. The Boatyard series is a 100% waterproof collection of leather work boots that provide traction, comfort and protection.

The leather version of the beloved Ankle Deck Boot is crafted of saltwater resistant leather that will wear to a fine patina over time. Built for coastal adventures on and off the boat these lightweight silhouettes sport the same XTRATUF non-marking, slip resistant Chevron outsole as their rubber counterparts.

AUNA SANDAL

Our designers started from the ground up with this all new take on what a sandal could do and be for our community. The Auna sandal is the result of years of testing and refinement. The Auna incorporates a high rebound PU footbed coupled with an abrasion resistant forefoot strap. This sandal is built to be supportive and comfortable for long days on the water or land. It features our innovative TUFgrp outsole, a revolutionary patent pending design constructed from a specially formulated rubber compound. TUFgrp provides next level traction on flat and hard surfaces as well as wet and uneven terrain. TUFgrp is independently verified SRC rated to deliver next-level non-marking grip.

PERFORMANCE CASUAL

You can wear these fishing or for any boating excursion. These XTRATUF® deck shoes not only look and feel great, but also keep you safe and sure-footed, thanks to our signature non-marking, slip-resistant Chevron outsole.

THE HOMER

The Homer was inspired by Alaska commercial fishermen who prefer to slip into a lightweight shoe during the down time when they aren't working the decks or when the fish aren't biting. The Homer is water resistant with a slipper like feel. A comfortable wool upper with a full faux-shearling lining keeps you warm and cozy, while a molded EVA insole provides added comfort. The classic XTRATUF non-marking Chevron outsole delivers great slip resistance.

COMMERCIAL GRADE

Built AlaskaTuf to perform in the harshest of conditions and stand up to the rigors of commercial fishing while providing agility, protection and comfort. Commercial Grade products from XTRATUF feature independently rated slip-resistant outsoles, materials that stand up to oil, acid, diesel and other hazardous elements and boot options with protective toe guards and reinforcements in high stress areas.

THE LEGACY COLLECTION

All boots within the Legacy collection are 100% waterproof. Each boot is made with our signature triple dipping technique, which creates a seamless barrier that is highly resistant to many organic and inorganic acids, chemicals and contaminants. Our latex neoprene is ozone resistant, and is softer, lighter, and far more pliable than ordinary rubber. Cushioned insoles with arch support help fight fatigue and stress on the legs and back. All XTRATUF® Legacy boots come with a non-marking, slip-resistant Chevron outsole that provides unparalleled traction on any surface in the most extreme conditions. Insulated styles come with built-in Polymeric Foam insulation. The insulation package will keep your feet warm even when it is -10°F.

WHAT GOES INTO OUR BOOTS

Triple-Dipped Rubber

XTRATUF dipped neoprene footwear is triple-dipped to create a seamless coating of rubber that is highly resistant to many organic and inorganic chemicals. Vulcanizing further seals and strengthens this superior watertight material

Neoprene Latex Rubber

Neoprene latex rubber is softer, lighter and far more pliable than ordinary rubber, making neoprene boots more comfortable and flexible

Hand-Layered Construction

Hand-layered construction allows flex and strength at critical stress points

XTRATUF X SALMON SISTERS

This collection's prints are original designs by two Alaskan fishermen, born and inspired by the wilderness of Alaska and the sustainable fisheries of the Pacific Northwest. Salmon Sisters products are designed in Alaska, inspired by nautical tradition, and made for a community of fishermen, adventurers, and ocean-enthusiasts. XTRATUF x Salmon Sisters footwear is designed to look good and get dirty because they're just too comfortable to take off. The Salmon Sisters work with organizations that support conservation of wild spaces and wild seafood.

ELITE COLLECTION

The Elite Collection is designed to provide the protection and durability of a Legacy boot with unmatched comfort for long days at sea or long hours on the dock. Using the Proprietary RDR™ oil/chemical resistant compound, this boot is resistant to many organic and inorganic acids, oils, chemicals and contaminants. Built with a Spandura® covered 5mm neoprene bootie; this allows the boot to be comfort rated to -20°F. XTRATUF® Elite boots are built on either our classic non-marking, slip-resistant Chevron outside that provides sure-gripping traction or the new Glacier Trek™ Pro outsole which provides traction on soapy tile, glycerin on steel and wet ice for truly Elite traction.

A detailed view of the bottom of a black shoe sole. It features a pattern of large, light blue hexagonal lugs. A black rectangular patch in the center of the sole has the 'GLACIER TREK' logo and 'XTRATUF non-marking' text. Three blue lines with square endpoints point from text boxes on the right to specific features on the sole: the top line points to a lug, the middle line points to a hexagonal lug, and the bottom line points to the sole's edge.

SRC Slip-resistant, omni-directional lugs designed with leading edges to provide the ultimate traction.

Glacier Trek™ PRO

Lugs provide sure-footing on wet ice.

Non-marking rubber outsole won't mark-up surfaces.

A man wearing a blue hoodie, jeans, and dark boots is standing on the white deck of a boat, holding a fishing rod. He is wearing sunglasses and looking towards the camera. The background shows a blue sky with white clouds and a choppy sea.

WHEELHOUSE

The Wheelhouse is the commercial grade version of the Ankle Deck Boot. We know standing on your feet 12+ hours a day at sea can cause feet to swell, and the wider fit of this boot is built for that reality. The upper is reinforced in high wear areas such as the toe and heel for maximum durability. The boot features an EVA/PU blend insole for all day comfort, and an SRC rated outsole for industry leading oil and slip-resistance.

WHEELHOUSE - MEN'S

- NEW** **XMW-101** | Sizes: 7-15 | Gray

BRISTOL BAY

The Bristol Bay collection is purpose built for mending nets, repairing engines, bleeding hydraulics, winterizing boats and loading up on provisions for the change of season. 100% waterproof and featuring an innovative comfort insole, these boots provide all day comfort and commercial grade slip resistance on or off the boat. They are tough enough for working in the boatyard while stylish enough for a run into town.
