

# NEW

# Maximizing the ultimate archery experience for everyone.

## Adjustability to Fit Nearly Every Archer.

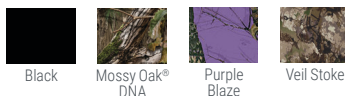

The Diamond Edge series has led the way in versatility and adjustability that doesn't break the bank. The Edge MAX takes it to a whole new level. Powering this high-performing machine is the Synchronized Binary Cam System, providing easy tuning and best in class downrange accuracy. A strategically engineered caged riser design increases stability to further increase accuracy. All this performance is coupled with a 15" range of draw length and a 50lbs range of draw weight adjustability to fit nearly any archer. Maximize your archery experience with the Edge MAX.
