

CARBON FIBER TRIPODS

Leupold's Carbon Fiber Tripods deliver maximum versatility and performance to hunters and shooters alike, with a rugged, lightweight design that's ready to go anywhere. The Mark 5 is built to mount to a rifle, and is perfect for competition shooters and predator hunters. The Pro Guide is meant for long periods of glassing and is sturdy enough to shoot from while maintaining a compact, lightweight design. The ultra-lightweight Alpine is designed for backcountry hunters and offers a tough, minimalist solution that's easy to carry on the go.

KEY BENEFITS

Maximum versatility and performance with industry-standard Arca-Swiss quick release system

Superior ruggedness with complete carbon fiber and aluminum construction

Go anywhere, at any time thanks to ultra-lightweight design

Enhanced customization features through third-party accessory compatibility

Rapid, precise viewing adjustment using smooth ball-head action

Greater usability across consumer spectrum with increased maximum tripod height
