DETECTION RANGE: 110'

PHOTO RESOLUTION: 30 MP

MODES: Photo, Multi-shot, Time-Lapse, Video

POWER: Internal rechargeable lithium battery and integrated solar panel

INCLUDED ACCESSORIES:

Installation Strap
32 GB SD card

FORCE-PRO-S

THE POWER TO PERFORM

The FORCE-PRO-S from SPYPOINT takes a monster of a camera and makes it even better by adding a solar panel used to charge an internal lithium battery to keep the camera powered for weeks and months on end. Capture images at an incredible 30 megapixels and take 4K videos so you can feel like you were in the woods when it happened. The added benefit of extended battery life means fewer trips to service batteries and the cost savings of not having to replace them.

EXTENDED BATTERY LIFE

The FORCE-PRO-S comes with an onboard lithium battery, charged by the integrated solar panel. With the solar panel always working to convert the power of the sun into reserved battery life for the camera, you can capture photos and videos for months on end without having to go in to replace batteries. Want extra security? Install eight AA batteries to take over if the onboard battery is depleted. Even more life added to your camera!

STUNNING IMAGE QUALITY

The FORCE-PRO-S is a beast of a trail camera, capturing ridiculously clear photos. Study every detail in these images, with 30 MP of resolution to examine. You don't have to guess what each photo holds; the clarity and image size will make you as sure as ever you're looking in the right spot.

4K VIDEO IN A TRAIL CAMERA

The FORCE-PRO-S takes video in 4K so the days of other trail cameras and their grainy, glitchy video is a thing of the past. Watch what happens in the woods like you're sitting there seeing it unfold. If you're serious about getting video information from the woods to help you scout, the FORCE-PRO-S is leading the pack.
