

FLEX-S

THE PERFORMANCE YOU WANT, THE POWER YOU NEED

The SPYPOINT FLEX-S delivers the same performance and flexibility of the original FLEX, with the added benefit of an integrated solar panel charging an internal lithium battery to keep your camera working longer than you ever imagined. Scout confidently knowing the sun shining on your FLEX-S is keeping the battery charged and the camera taking pictures.

EXTENDED BATTERY LIFE

The FLEX-S is equipped with an onboard lithium battery constantly being charged by the integrated solar panel on the top of the camera. Want to be sure your camera will keep working? The internal battery can be used alongside the eight-AA battery tray or the LIT-22 lithium battery installed as well, extending battery life even further. A cellular camera you don't even have to visit frequently to manage batteries? Every hunter's dream!

STUNNING PHOTOS AND VIDEOS

The SPYPOINT FLEX-S captures and transmits 33 MP photos and 1080p videos with sound to the SPYPOINT app so you don't miss a thing. The responsive trigger automatically configures the camera's settings to the exact conditions at the time of the photo to deliver the very best quality, every time. Additionally, the SPYPOINT FLEX is capable of taking photos or videos even while the camera is transmitting previous ones, ensuring you never miss that big buck!

RELIABLE CONNECTIVITY VIRTUALLY ANYWHERE

The FLEX works on all major cellular networks and will automatically connect to the one with the best coverage in the area thanks to the dual-sim configuration of the camera. No more worrying about carrier models or coverage maps. The antenna has been designed to optimize the available cellular signal to deliver exceptional connectivity virtually anywhere you place your camera.

SIMPLE SETUP AND MAINTENANCE

Getting the SPYPOINT FLEX-S set up is easy and intuitive, while on-camera buttons allow you to format the microSD card and take a test photo. You can leave the field confident in your trail camera's positioning, framing and network connectivity, and keep it running at peak performance by managing settings and updating your firmware from your home.

CUSTOM SCOUTING OPTIONS

The SPYPOINT FLEX-S is GPS enabled to maximize the functionality and accuracy of the customizable maps feature of the SPYPOINT app. The FLEX-S offers four capture modes: Photo, Video, Time-Lapse, and Time-Lapse+. The Time-Lapse+ function takes photos at your preferred interval and when the camera's detection sensor is triggered. No matter how you want to scout, the FLEX has you, and your hunting property, covered.

ABOUT SPYPOINT

SPYPOINT, the world's #1 cellular trail camera brand, revolutionized the hunting industry by making mobile scouting accessible to all. Our reliable, easy-to-use cameras and innovative photo and camera management app with customizable maps, weather, and BUCK TRACKER AI filters, are designed with one goal in mind: to make you a more prepared and efficient hunter. With SPYPOINT you have the entire hunt in the palm of your hand.

SOLAR CELLULAR TRAIL CAMERA
