

The MeanDuck is a loud and aggressive J-frame style call. It brings that crunchy, "hybrid" style sound to our line of calls. It's much easier to operate than a cutdown, but still packs that raspy deep tone of a cutdown. The MeanDuck is compact and responsive, delivering the full range of rasp that today's duck hunters expect. The unique bore system we built into this call delivers a lot of punch while retaining enough back pressure to allow for ample forgiveness when air presentation is less-than-ideal.
