

XPS2™

Limited Edition
BETSY ROSS

EOTECH has partnered with Black Rain Ordnance® to show our "Made In America" pride by introducing the Betsy Ross Limited Edition XPS2 with cerakote finish. The non night-vision version of our shortest and lightest HWS sight so far. The CR123 lithium battery configuration of the XPS2 provides additional rail space, leaving more room for rear iron sights or magnifiers. Also offering water-resistant capability up to 10 feet, the XPS2 is a great compact and lightweight option for your platform.
