

RAVIN®

RAVIN® INTEGRATED XERO® X1I CROSSBOW SCOPE \$1,899.99

In a game of inches, this is game over.

Target something greater from two apex leaders in crossbow accuracy. The Ravin® integrated Xero® X1i Crossbow Scope is customized exclusively for Ravin from Garmin®, and optimized for your Ravin crossbow model. Sighting in the Xero X1i scope is quick, easy, and automatic. Simply mount the scope, select your Ravin model, and sight-in at 20 yards—the precise digital aimpoints are pre-calibrated. Garmin Xero X1i's advanced processor does the rest. It's a fusion of accuracy unlike anything the world has seen. This high-performance upgrade increases deadly accuracy and eliminates the need for a rangefinder, saving precious ounces and unnecessary gear.

The X1i is preloaded with the ballistics for every model ever made by Ravin except R18 series crossbows.
