Product Description

It's not easy to find a boot that will stand up to the harsh conditions of concrete job sites and the ranch. Fear not, the Immortalizer, with its crack-resisting leather upper, fights against lime and ammonia found in mortar and concrete slurry. It also fights against acids and chemicals on the ranch and farm. The easy clean outsole means that you can scrape off the sludge at the end of the day. Or, just leave the boots at the doorstep.

Product Features
