HIGH RESOLUTION AT AN UNBEATABLE PRICE

The SPYPOINT FORCE-48 provides incredibly **high-resolution images and 720p** videos from the field for game scouting, wildlife tracking, and property management.

The FORCE-48's high resolution **48MP photos** allow you to see your targets up close and personal like never before. Equipped with a **configuration screen** that enables easy set-up and adjustment of the camera, the FORCE-48 offers three capture modes; **Photo, Video, and Time Lapse**. The Time-Lapse mode takes photos at your preferred interval, perfect for monitoring an area closely at specific times of the day.

To catch even more detail, the FORCE-48 offers the **multi-shot function** which takes up to five photos per detection. **48 low-glow LED lights** provide 80' of illumination and **infrared boost technology** allows you to maximize lighting when it counts, so you get a high-quality photo or video no matter what time of day (or night) it is captured.
