

Nucleus Heated Socks – MUD-HT-SOCK-CL

Short copy: Because there aren't many things capable of ruining a hunt quite as quickly as a pair of frozen feet, you'll want a long-lasting and adjustable heat source to get through long, cold days in your stand. Introducing our all-new Nucleus Heated Socks. Complete with an included battery powering three heat settings ranging from low, to medium and high, these heavy-duty heated socks are ideal for wearing through the late season. To adjust the heat setting, press the easy-to-access power button at the top of each sock to choose the most appropriate level of warmth. Trust us. Your feet, and the success of your season, will be thankful.

Long copy: For a late-season whitetail hunter, there's no greater threat than failing to outlast the cold, wind and snow that challenge you on each venture into the field. As the season wears on and brutal winter weather rolls in, all-day sits become more grueling. Temperatures plummet and your body works harder to keep from tensing as warmth is drawn quickly away from your body's core and extremities—the areas that lose it most rapidly in below-zero conditions. And, because there aren't many things capable of ruining a hunt quite as quickly as a pair of frozen feet, you'll want a long-lasting and adjustable heat source to help you through long, cold days in your tree stand. Introducing our all-new Nucleus Heated Socks. Complete with three heat settings ranging from low, to medium and high, these heavy-duty socks are ideal for wearing during late season, delivering the ability to warm your most stationary extremities through any weather conditions with minimal movement required. And that includes adjusting the temp of the socks as you see fit. Simply press the easy-to-access power button at the top of each sock to choose the most appropriate mode and enjoy all-day warmth from the included rechargeable batteries. Trust us. Your feet, not to mention the success of your season, will be thankful.

- Rechargeable heated socks keep your most stationary extremities warm
- Ideal for all-day hunts in unpredictable late-season conditions
- Three heat settings keep wearers' feet warm in any conditions:
 - Low (up to 8 hours runtime)
 - Medium (up to 5 hours runtime)
 - High (up to 3.5 hours runtime)
- Each sock features one heating element across the toes powered by one 3,500mAh battery (included)
- Batteries recharge to full capacity in as little as 3 hours via the included charging cord
- Silent, easy-access power buttons at the top of both socks make choosing warmth settings simple
- Heat settings can be adjusted with minimal movement, so your presence remains undetected
- Warmth-retaining 40% Merino wool/24% acrylic/16% nylon/17% polyester/3% spandex construction is luxuriously soft
