

Stealth Cam Fusion™ MAX 2.0 Cellular Trail Camera – STC-FXWTX2

Short copy With the Fusion™ MAX 2.0 Cellular Trail Camera—yet another evolution of Stealth Cam’s Fusion X trail camera line—users enjoy the same core functionalities, in addition to boasting advanced PIR for a longer detection range, 16GB of secure internal memory storage, and twice the battery life for a total of 16AA batteries. This camera now also delivers 1080P video with audio and is compatible with Stealth Cam’s FieldMAX assortment of rechargeable lithium cartridges/battery packs and solar panels* that provide an alternative power supply to setups in any location. Features two pre-installed SIM cards and our Automatic Network Coverage feature that continuously monitors AT&T and Verizon signal strengths, ensuring automatic connection to the strongest network for connectivity you can count on via the Command Pro app. On Demand photo and video capture takes and sends crystal-clear photos and videos with audio in real-time, while the 80-foot detection and infrared flash range with 0.4-second trigger speed captures one to six images in burst mode.

Long copy: Getting bucks on camera and to your mobile device is no longer hit or miss ... starting now. Overcome spotty cellular service in some of the most remote hunting locations with the Fusion™ MAX 2.0 Cellular Trail Camera—yet another evolution of Stealth Cam’s Fusion X trail camera line. This camera provides all the same core functionalities, in addition to boasting advanced PIR for a longer detection range, an improved internal memory capable of storing up to 16GB of data and imagery, and twice the battery life for a total of 16AA batteries, which means you’ll be far more efficient. The internal photo and video storage ensures a more stable location for accessing and viewing captures without the need for an SD card. And, speaking of video, this cellular camera now also delivers 1080P video with audio, bringing crispness and clarity to levels never before seen in a Fusion X line device. Plus, for those looking to take it one step further, it’s also compatible with Stealth Cam’s FieldMAX assortment of rechargeable lithium cartridges/battery packs and solar panels* that provide an alternative power supply to setups in any location—whether in direct sunlight or heavily wooded areas and boasts a continuation of some of the best features Stealth Cam has to its name, including:

- Reliable connectivity anytime, anywhere via the **Command Pro app****, a state-of-the-art platform loaded with industry-exclusive features. Among those unique features is access to the **On Demand function**, which allows users to send a command for a specific camera to capture photos or video of their hunting area in real-time with just the push of a button, and seamless integration with [HuntStand](#), North America’s No. 1 hunting and land management app. Both of those functionalities, in addition to a long list of others, come courtesy of the Command Pro app, including free camera sharing, AI night colorization, advanced filtering capabilities, and much more.
- **Dual network coverage** across Verizon and AT&T providers ensures trail cameras transmit using the strongest signal available.
- **Quick Scan QR code setup** that simplifies the process of getting cams up and running in the field where they’re meant to be.
- **Built-in GPS functionality** to help users keep track of the cam’s exact location, regardless of where you hang it.

The Fusion MAX 2.0 also takes and sends crystal-clear photos and videos with audio in real-time to let you know exactly what conditions are on the ground, as well as what animals are in the immediate area. A long-reaching 100-foot detection and infrared flash range delivers broad coverage, while the 0.4-

second trigger speed captures one to six images per trigger to ensure you never miss a moment of action. And, since every photo and video are stamped with the corresponding date, time, moon phase, temperature and camera name, you'll have no doubt when prime time hits leading up to season openers. Durable weatherproof housing and integrated cable lock latch protect the camera, while a ¼-inch threaded insert and 12-volt DC auxiliary jack make adding mounting hardware a breeze.

Learn more about our new [Command Pro App](#) and [industry-leading data plans](#).

- Advanced PIR delivers a longer detection and infrared flash range, sensing movement as far out as 100 feet
- 16GB of internal memory storage ensures overall stability and performance
- Delivers improved 1080P HD videos with audio
- New built-in GPS functionality ensures you know where the cam is located, ideal for sharing data with other Command Pro app users
- Powered by 16 AA batteries to prolong camera life and reduce trips afield to keep things running
- Compatible with Stealth Cam's FieldMAX line of rechargeable lithium cartridges and solar panels
- Two pre-installed SIM cards connect to either AT&T or Verizon network signals
- Automatic Network Coverage selects the strongest network
