

## Muddy MATRIX™ 2.0 Cellular Trail Camera – MUD-MTRX2

**Short copy:** Our new MATRIX™ 2.0 Cellular Trail Camera comes with our Automatic Network Coverage feature set up and ready to go, thanks to two preinstalled SIM cards. Once activated, the camera selects the strongest cellular signal, Verizon or AT&T, and automatically connects. From its high-resolution 36MP imaging and rich 1080P full HD video with audio to the long-reach 80-foot detection and flash range for broad coverage of prime hunting areas, this cam delivers big, even when compared to its predecessor. It also boasts a 0.4-second trigger speed that captures between one and six crystal-clear pictures per activation, ensuring you're privy to all the nitty-gritty details of the moment they were taken. Compatible with the Command Pro app and all its features, including On Demand functionality.

**Long copy:** Cellular reception can be problematic in remote areas, it's no secret. But lucky for you, our new MATRIX™ 2.0 Cellular Trail Camera comes with our Automatic Network Coverage feature already set up and ready to go, thanks to two preinstalled SIM cards. Once activated, the camera selects the strongest cellular signal, Verizon or AT&T, and automatically connects to provide uninterrupted communication with your mobile device, 24/7. From its high-resolution 36MP imaging and rich 1080P full HD video with audio to the long-reach 80-foot detection and flash range for broad coverage of prime hunting areas, this cam knows the meaning of consistency and delivers big, even more so than its predecessor. And, because it also boasts a 0.4-second trigger speed, the cam captures those pictures—between one and six per activation—and videos sharply and clearly, ensuring you're privy to all the nitty-gritty details of the moment they were taken.

Utilization of the **Command Pro app\***, a state-of-the-art platform with industry-exclusive features, also ensures reliable connectivity of each camera anytime, anywhere. Among the unique features users have access to is the **On Demand function**, which allows for sending commands for specific cameras to capture photos or video of their hunting area in real-time with just the push of a button, and seamless integration with [HuntStand](#), North America's No. 1 hunting and land management app. Both of those functionalities, in addition to a long list of others, come courtesy of the Command Pro app, including free camera sharing, AI night colorization, advanced filtering capabilities, and much more.

Learn about our new [Command Pro App](#) and [industry-leading data plans](#).

- Compatible with the Command Pro app which lets you remotely monitor cameras, download images and videos, operate cameras through mobile devices, and more
- On Demand photos and videos keep you informed in real-time, with just the push of a button
- Captures and delivers high-definition 36MP images (36MP/8MP/4MP)
- 80-ft. detection and flash range ensure long-distance camera activation for data collection
- Integrates seamlessly with HuntStand, North America's No. 1 hunting and land management app
- Preinstalled SIM cards provide dual-network coverage from either AT&T or Verizon carriers
- Automatic Network Coverage detects which carrier has the best signal and automatically connects your trail camera
- Camera details, including location and photo/image captures, can now be shared with other Command Pro app users
- Distressed exterior housing offers a detailed, natural finish that blends in with natural backdrops, ensuring the camera remains anonymous to animals
- Lightning-fast, 0.4-second trigger speed ensures you'll never miss any of the action
