

Muddy Mitigator 2.0 Cellular Trail Camera – MUD-MTGTRK

Short copy: Muddy's next-generation Mitigator 2.0 Cellular Trail Camera delivers access to On Demand photo and video capabilities via the Command Pro app, as well as an improved 720P HD video with audio format to deliver even more insight into what animals are doing on your property. Pair that with its ability to capture sharp 24MP images thanks to a long-reaching 80-foot detection and flash range, and you'll enjoy broad coverage of your hunting spot 24/7. The cam's distressed housing finish ensures it disappears seamlessly into the landscape, remaining virtually undetectable. Automatic Network Coverage selects the strongest network signal in the area, either Verizon or AT&T, to provide uninterrupted communication between the camera and your preferred mobile device. Through the Command Pro app, you'll also enjoy access to features like integration with [HuntStand](#), North America's No. 1 hunting and land management app, free camera sharing, AI night colorization, advanced filtering capabilities, and much more.

Long copy: Looking for a trail cam that delivers unbeatable bang for your buck this season? Thanks to Muddy's next-generation Mitigator 2.0 Cellular Trail Camera, you can now consider your search complete. The Mitigator 2.0 Cellular Trail Camera accommodates nearly any budget while delivering everything you need to inventory and pattern game frequenting your property, including some new game-changing features, like access to On Demand photo and video capabilities via the Command Pro app. With this functionality, users can send commands to specific cameras for capturing photos or videos of their hunting area in real time, with just the push of a button. Not only that but the camera's video quality has also been boosted, now available in an improved 720P HD video with audio format to deliver even more insight into what animals are doing at any given time of day. Pair that with its ability to capture sharp 24MP images thanks to a long-reaching 80-foot detection and flash range, and you'll enjoy broad coverage of your hunting spot 24/7, all season long. Plus, regardless of where you hang it, the cam's distressed housing finish ensures it disappears seamlessly into the landscape, remaining virtually undetectable by humans and critters alike.

Because cellular reception can be problematic in remote areas, our Automatic Network Coverage feature ensures active cameras are covered, no matter what, by choosing the strongest network signal in the area. Whether the provider is Verizon or AT&T, users will enjoy uninterrupted communication between their camera and preferred mobile device, as well as the capacity to share their Mitigator camera details—from its location to the photos and videos it's capturing—with other Stealth Cam Command Pro App users via text messages, emails, or popular social media platforms.

Utilization of the **Command Pro app***, a state-of-the-art platform with industry-exclusive features, also ensures reliable connectivity of each camera anytime, anywhere. In addition to accessing the app's On Demand feature, users can integrate [HuntStand](#), North America's No. 1 hunting and land management app, while also experiencing free camera sharing, AI night colorization, advanced filtering capabilities, and much more.
