

## Wildgame Innovations ORBIT™ 360° Trail Camera – WGI-ORB360

**Short copy:** Thanks to the ORBIT™ 360° Trail Camera from Wildgame Innovations, users can enjoy crisp 36MP photos and 1080 HD video with audio, all captured via a revolutionary, 360-degree pivoting lens. That lens creates a panoramic view comprised of a series of six images, each captured from a unique zone around the circumference of the camera. Its lightning-fast 0.4-second trigger and motor speed respond almost immediately to movement, so the camera consistently delivers captures to users' mobile devices as close to real-time as possible. Adding to this camera's appeal are three available mode options, including: single-zone, 180-degree zone and 360-degree zone capture. Four power LEDs boast an 80-foot detection range that pairs with a 0.4-second trigger speed, burst mode and timelapse capabilities to provide 24/7 updates. Features a ¼" threaded mount, 12V DC auxiliary jack and optional t-post mounting bracket (included) and is compatible with the HuntSmart® app.

**Long copy:** Tired of missing camera-wary game passing by your setup? Don't have the resources to dedicate multiple cellular trail cameras to cover a full 360° around a well-worn deer trail? Thanks to a new, 360-degree camera from Wildgame Innovations, you can make those worries a thing of the past this season. With the new ORBIT™ 360° Trail Camera, users enjoy crisp 36MP photos and 1080 HD video with audio, all captured via a revolutionary, 360-degree pivoting lens capable of delivering a unique, panorama-style view of its surroundings. That panoramic view comprises a series of six images, each captured from a unique zone around the circumference of the camera. And, with a complete 360 degrees of viewing potential comes a significantly reduced risk of missing out on nearby action, whether it's taking place during daylight hours, or overnight. The ORBIT features a lightning-fast 0.4-second trigger and motor speed that responds almost immediately to movement, so the camera consistently delivers captures to users' mobile devices as close to real-time as possible. Adding to this camera's appeal are the three available mode options, including:

- **Single-zone photo capture**, which takes a single photo or video of the zone in which movement occurs when the camera is triggered.
- **180-degree zone photo capture**, which takes three photos when the camera is triggered: one of the zone to the left of the triggered zone, one of the triggered zone itself, and one of the zone to the right of the triggered zone.
- **360-degree zone photo capture**, which takes six photos—one of each zone—in a clockwise rotation, sending users panorama-style imagery of the entire area surrounding the camera.

And, when these features pair with the device's integration with Wildgame Innovations' HuntSmart® app\* functionality, hunters can enjoy their cellular trail cameras like never before. This mobile platform boasts industry-exclusive features, including:

- Integration with [HuntSmart](#), the ultimate scouting app, which allows tagging, filtering, sorting and organizing of images across all of your active cameras, before setting up a network to share them with friends and family.

- The convenience of On Demand capabilities via commands sent requesting a specific camera to capture photos or video in real-time, with just the push of a button.
- A long list of one-of-a-kind functionalities, like camera locator technology, weather data, image recognition, advanced filtering capabilities, and more.
- A variety of subscription plan options, all utilizing the app's game-changing scouting features with all active WGI game cameras.

In addition, the camera's four power LEDs boast a far-reaching 80-foot detection range which pairs with the 0.4-second trigger speed, burst mode and timelapse capabilities to provide nearly instant, 24/7 updates, whenever one of the six zones is triggered. Powered by a 16pc dual cartridge battery, the ORBIT also features a ¼" threaded mount, 12V DC auxiliary jack and optional t-post mounting bracket (included) to ensure you can make most of every potential setup, in almost no time flat. Ideal for use on field edges and in other open areas, such as overlooking prime food plots, this trail cam offers unobstructed views, and thus, consistently clear and accurate imagery, regardless of location.

- Revolutionary 360-degree cellular camera quickly adjusts to cover six unique zones whenever it is triggered
- Panoramic coverage captures movement anywhere in front of, beside, or behind the camera, thanks to a silent pivoting motor
- Offers the option of single-zone, 180-zone and 360-zone photo and video capture
- Integrated with HuntSmart app functionality, including access to On Demand capabilities and more
- Instantly delivers 36MP photos and 1080 HD video with audio out to 80 feet
- Four power LEDs ensure day and nighttime imagery is clear, 24/7
- 0.4-second trigger speed responds quickly, capturing as many as three photos per burst
- Powered by a 16pc dual cartridge battery
- Includes a DC auxiliary jack, ¼" threaded mount and optional t-post mounting bracket

*\*Wildgame Innovations' HuntSmart® app is available for download via any app-enabled device through the App Store or Google Play.*
